

**Employee Self-Service & Leadership Oversight Platform**

**Enterprise Business Management Tool for  
Completing Tasks and Automating Workflows**

## Does your organization need to optimize its workflows?

Facility Security Officers (FSOs) have a lot to juggle: whether they are answering a visit request, checking on the status of an investigation, sending out documents or submitting reports, every task is important – and often time-consuming.

**Portal Commander™** is a comprehensive, dashboard-driven security platform that frees up FSOs by providing self-service features to employees, executives, program managers and other stakeholders at cleared facilities. Based on user role, Portal Commander™ provides easy access to personal information, key metrics, workflow insights and more.

**PORTAL COMMANDER™ IS AVAILABLE ON-PREMISES OR IN THE CLOUD!**

### **Portal Commander™ allows organizations to follow guidelines and meet deadlines** **– all within one platform.**

In organizations following federal security policies and regulations for cleared personnel, Portal Commander™ makes compliance and oversight second nature. Through default and custom modules, stakeholders can easily retrieve information about contracts, personnel, business processes and more.

Portal Commander™ benefits users at every level of your organization with easy-to-navigate, role-based dashboards that provide access to real-time data at a glance. In just a few clicks...

- **Employees** can submit and track requests from start to finish, fill out documents, and access personal information like contracts and clearances.
- **Security Officers** can manage day-to-day operations with ease, exercise oversight, fill out forms and more.
- **Supervisors** can easily monitor all personnel who answer to them and stay updated on their activities
- **Program Managers** can find process bottlenecks and adjust workflows as necessary, keeping tasks on time and on budget
- **Executives** can see analytics and drill-down through the data they need to make informed, smart decisions for every contract.
- **HR and Business Development** can search and explore cleared personnel by contract, skillset, level of clearance and more.
- **Upper management** can submit welfare checks on cleared personnel to ensure their safety in perilous situations, from natural disasters to terrorist attacks.

Now, select Portal Commander™ modules are accessible from mobile devices, allowing all stakeholders to view information under their personal profile and complete tasks on-the-go.

### **Customize your experience**

Portal Commander™ provides full integration with third-party applications and all MathCraft products for improved productivity and efficiency. Portal customers can also take analytics and workflow automation to the next level with custom modules to handle complex, multi-stage business processes.

## Employee Self-Service & Leadership Oversight Platform

Does your organization need to optimize its workflows?

#### Going Beyond Personnel Requirements

Other solutions address personnel requirements but leave other critical security procedures in the dark.

**Portal Commander™** is the only solution for enterprise security compliance that provides customization to meet the demands of any organization, offering unmatched visibility into daily activities and workflows

### How Can Portal Commander™ Transform Your Enterprise?

## AVAILABLE ON-PREMISE OR IN THE CLOUD

Portal Commander is offered in two different versions:

**Portal Commander™ Standard Edition** delivers a comprehensive, dashboard-driven platform for managing security processes, providing Access Commander® data visibility to employees, security professionals and corporate executives. Portal Commander does more than streamline security processes; it also:

- **Automates forms for data capture into Access Commander® modules, such as Outgoing Visit Requests and Foreign Travel Requests**
- **Frees up FSOs for higher value-added tasks**
- **Provides extensive Dashboards and Metrics**
- **Expands to meet customer requirements**
- **Offers flexibility for custom forms**

#### Portal Commander™ Business Process Management (BPM)

is the ultimate version of Portal Commander™, offering a comprehensive solution to the business side of security: from FSO oversight and contract management to activity tracking, Portal BPM has everything executives need to run their business, build efficiencies, standardize processes and push tasks to completion.

- **Analytics of business processes to identify bottlenecks**
- **Real-time tracking of each request**
- **Real-time visibility of processes**
- **Standardized, consistent and measurable process flows**
- **Automated and optimized email traffic**

**MathCraft Security Technologies offers innovative industrial security tools that are compliant with 32 CFR Part 117, NISPOM Rule.**

#### **Industrial Security Management Software**

Access Commander®, is the state-of-the-art solution for FSOs and other security professionals.

#### **Employee Self-Service & Leadership Oversight Platform**

Portal Commander™ is an employee self-service portal with a comprehensive, dashboard-driven platform for managing security processes, providing Access Commander data visibility to all employees.

#### **Visitor Management Solution for Cleared Facilities**

ViSi Commander™ brings together the security professionals in your organization – from reception to FSOs and other cleared employees – and allows them to optimize your visitor management process by working within the same system.
